

20220127 Int Network Repatriation

We are so happy that 2 mothers and 4 children soon will land on Swedish ground, after being repatriated from Roj Camp yesterday.

The official narrative in Sweden is not that Sweden has repatriated them, but the AANES are expelling them and Sweden is receiving them. This is the third batch since Sweden shifted their policy and started to bring home women and children. (September, October and now). [REDACTED] There are now 6 Swedish family units remaining in Roj. We think there are few more Swedish families still remaining in al-Hol. They are harder to reach and by some reason they have not made themselves known as Swedish citizens. We are therefor doing this campaign as an attempt to try to reach them for them to get info to make an informed decision.
